

CV OF THE EXPERIENCED RESEARCHER

PERSONAL INFORMATION

Family name, First name: Fatsini, Elvira

ORCID ID: 0000-0003-0371-5290

Ciênciea ID: EA1D-0571-7A6D

Date of birth: 17/07/1984

Nationality: Spanish

Publons:

h-index 5; 80 citations

Google Scholar profile:

h-index: 6; Total citations: 124

<https://scholar.google.es/citations?hl=en&pli=1&user=55mbsZIAAAAJ>

RESEARCH EXPERIENCE:

My scientific career started in 2005 when I was entered in the group of Pathology and Histopathology of marine species belonging to Department of Biology of the University of Cádiz (Spain) as a volunteer student. Prof. Maria Luisa de Canales supervised my training for 9 months. The main objective was the study of the different diseases present in seabream and seabass juveniles under captive conditions using several histological procedures. In the same year, I had the opportunity to continue my research training at the Institute of Research and Technology Food and Agriculture (IRTA, Spain) at the Department of Aquatic Pathology supervised by Dr. Ana Roque for 3 months. In this case, I learnt microbiology and bacteriology techniques working with different mollusc species. In 2008, I repeated the experience in IRTA supervised by Dr. Ana Roque for 3 months but in this case, I was focussed on molecular biology of bacteria. In 2010, I was able to carry out my **Master project** on the detection and characterization of *Vibrio parahaemolyticus* in mollusc of two Ebro delta bays production: Alfacas and Fangar. This was my first contact with high-level research, and it represented the starting point of my career in aquaculture research. Later, in 2012, I was awarded a prestigious **Predoctoral Fellowship** (INIA) from the Spanish Government to complete my PhD in **Fish reproductive behaviour and chemical communication** always focused in aquaculture production at the Institute of Research and Technology Food and Agriculture (IRTA, Spain) where I worked under the supervision of Dr. Neil John Duncan (2012 - 2016). I completed my doctorate at the Polytechnic University of Valencia in April 2017. My PhD research dedicated in the study of reproductive behaviour, chemical communication and dominance behaviour in high-value fish, such as Senegalese sole, mainly characterising the different behavioural aspects associated with spawning period and the implication of urine during this reproductive phase. I also provide the importance of the behavioural studies, such dominance, stress coping style (individual and group) to try to improve the production systems in aquaculture. Moreover, I had the opportunity to benefit from several stays during my PhD in prestigious Research centres to acquire better knowledge in molecular biology and chemical communication in fish. I was awarded the Postdoctoral Fellowship associated with the Project “*REPROF1 - Condicionamento de indivíduos F1 de linguado Senegalês com perspetivas à reprodução em cativeiro*”, funded by Mar2020 Program (Direção Regional de Agricultura e Pescas do Algarve) under Dr Elsa Cabrita supervision where I am performing several activities (conditioning, chemical communication and genomics) related to Senegalese sole reproduction. I was awarded the Postdoctoral Fellowship related to the Project “*EBB - European Marine Biological Resource Centre Biobank*” where I am going to perform cryobiology methods in several fish species to preserve biological material. Recently, I have been awarded the **Junior Researcher position** under the project “*Mitigation solutions for the reproductive disorder of Senegalese sole cultivation (MITIGASOLE)*” to be conducted in the Centre of Marine Sciences (CCMAR) funded by FCT CEEC program (Portugal).

ACADEMIC BACKGROUND

11/04/2017	PhD Cum Laude in Animal Production Science Polytechnic University of Valencia, Valencia, Spain
13/10/2009 – 24/12/2010	Master's degree in Aquaculture University of Valencia and Polytechnic University of Valencia, Valencia, Spain (Top 10 % student)
01/09/2002 – 09/09/2008	Bachelor's degree in Marine Sciences (Average 1.6) University of Cádiz, Cádiz, Spain.

RESEARCH BACKGROUND (S)

16/04/2021- *present position* Junior Researcher **FCT Stimulus of Scientific Employment, Individual Support** (“MITIGASOLE” - Mitigation solutions for the reproductive disorder of Senegalese sole cultivation) Reproduction Biotechnology, Centre of Marine Sciences (CCMAR), Faro, Portugal.

15/02/2020 – 31/03/2021 Post-Doctoral **Interreg Espaço Atlântico fellow** (“EBB”- European Marine Biological Resource Centre Biobank) Reproduction Biotechnology, University of Algarve, Faro, Portugal.

15/02/2018 – 14/02/2020 Post-Doctoral **MAR2020 fellow** (16-02-01-FMP-0059 – “REPROF1”) Reproduction Biotechnology, University of Algarve, Faro, Portugal.

PREVIOUS POSITION (S)

02/11/2012 – 11/04/2017	PhD student. Department of Fish Reproduction and Culture, Institute of Research and Technology Food and Agriculture (IRTA), Tarragona, Spain. Supervisor: Dr. Neil John Duncan Tutor: Dr. Luz Pérez (Polytechnic University of Valencia, Spain). Topic: Reproduction, olfaction and dominance behaviour in Senegalese sole (<i>Solea senegalensis</i>).
01/06/2010 – 01/11/2010	Master's candidate. Aquatic Pathology Department, Institute of Research and Technology Food and Agriculture (IRTA), Tarragona, Spain. Supervisor: Dr. Ana Roque. Topic: detection and characterization of <i>Vibrio parahaemolyticus</i> in mollusc of two Ebro delta bays production
01/01/2006 – 01/01/2007	Student intern. Department of Biology, Faculty of Marine and Environmental Sciences, University of Cádiz, Cádiz, Spain. Supervisor: Prof. Maria Luisa de Canales. Topic: Histopathological study of seabream (<i>Sparus aurata</i>) and seabass (<i>Dicentrarchus labrax</i>).

PARTICIPATION IN RESEARCH PROJECTS (Role as a PI and Team member)

1. New approaches on the dietary-effects in broodfish: the role of nutrition on sustainable production of flatfish. EEA Grants call#4 Blue Growth - BREEDFLAT (2021 – 2024). **European Union**. Partners: ACUINOVA, CIIMAR (Portugal partners); NORD UNIVERSITY, SONG AQUA, AKVA-PLANIVA (Norway partners). Principal investigator at CCMAR: Prof. Elsa Cabrita. EU total funding: €755,774.
2. The imprinted characteristics of spermatogonia antioxidant capacity and their role in oxidative stress tolerance - GERMROS (2022-2023) (EXPL/CVT-CVT/0305/2021). **PEX project funded by FCT, Portugal**. Principal investigator: **Elvira Fatsini**. Total funding: €50,000.
3. New approaches on the antioxidant diet-effect in fish sperm traits: the role of sperm microRNAs on transgenerational transmission-SPERMANTIOX (2021 – 2023) (PTDC/CVT-CVT/4109/2020). Principal investigator: Elsa Cabrita. Total funding: €249,769.98
4. Improvement of sperm quality indicators in spotted wolffish (*Anarhichas minor*) (2020 – 2022), **EEA Grant (Bilateral Action Funds)**. Principal investigator: **Elvira Fatsini**. Total funding: €10,768.
5. Asociación de la comunicación química y el estatus social en el lenguado senegalés según las condiciones de cultivo para la producción de reproductores - CONDISOLE (2019 - 2020) Campus de Excelencia Internacional del Mar (**CeiMar**). Principal investigator: **Elvira Fatsini**. Total funding: €4,000.
7. Unrevealing the ecological impacts of nanoparticles toxicity in the reproduction of marine organisms (NANOREPROTOX) (2018 – 2021). **FCT**, Potugal. Principal investigator: University of Aveiro (Claudia Mieiro) and Center of Marine Science (Elsa Cabrita).
8. Condicionamento de indivíduos F1 de linguado senegalês com perspetivas à reprodução em cativeiro - REPROF1 (2017 – 2020) (ref. 16-02-01-FMP-0059). **Programa MAR2020**, Direção Geral das Pescas e Agricultura. Principal investigator: Prof. Elsa Cabrita. Total funding: €273,493.96.
9. Bases para a implementação de uma nova espécie na aquacultura em Portugal - SERINOVA (2017 - 2020) (ref: 16-02-01-FMP-0064). **Programa MAR2020**, Direção Geral das Pescas e Agricultura. Principal investigator: Prof. Elsa Cabrita. Total funding: €400,493.96.
10. European Marine Biological Resource Centre Biobank - EBB (2017 - 2021) (EAPA_501/2016). Programa Interreg Atlantic area (UALG (Portugal), CIIMAR (Portugal), UPV/EHU (Spain), UVIGO (Spain), FF (Spain), NUIG (Ireland), UPMC (France), SAMS (UK), IMR (Norway), MBA (UK), UGent (Belgium). Principal investigator (UALG): Prof. Elsa Cabrita. Total funding (UALG): €136,685.40.
11. Broodstock management based on behaviour to increase the production of gametes and reproductive output in cultured and wild Senegalese sole (*Solea senegalensis*). Gestión de los reproductores basada en su comportamiento para aumentar la producción de gametos y el éxito reproductivo en el lenguado senegalés (*Solea senegalensis*) cultivado (F1) y salvaje (2015 - 2018). Project N°: RTA2014-00048-00-00. **Instituto Nacional de Investigación y Tecnología Agraria y Alimentaria (INIA)**, Spain. Principal Investigator: Dr Neil John Duncan. Total funding: €180,000

12. Exploring the biological and socio-economic potential of new/emerging candidate fish species for the expansion of the European aquaculture industry (DIVERSIFY) (2013 - 2018). Grant agreement no: 603121. **European Union**. Reproduction and Genetics work package leader: Dr Neil John Duncan. PROJECT COORDINATOR: Dr Constantinos Mylonas (HCMR) Dr Alicia Estévez (IRTA). Total funding: €739,717.30

13. Caracterización de los perfiles de comportamiento (estilos de afrontamiento al estrés) y su impacto en el éxito reproductivo del lenguado senegalés (*Solea senegalensis*) (2011-2015). Project Nº: RTA2011-00050-00-00. **Instituto Nacional de Investigación y Tecnología Agraria y Alimentaria (INIA)**, Spain. Principal Investigator: Dr Neil John Duncan. Total funding: €207,098.40

14. DATAQUEST: Inventory of data sources relevant for the identification of emerging diseases in the European aquaculture population (2010 - 2011). Project Nº: EFSA-Q-2009-00739. **European Food Safety Authority (EFSA)**. Principal Investigator(s): Dr Chris Rodgers (IRTA) Dr Ana Roque (IRTA) Dr Marcos (Marine Laboratory).

15. Improving European mollusc aquaculture: disease detection and management (BIVALIFE) (2007 - 2010). Project Nº: THEME [KBBE.2010.1.2-08]. **European Union**. Principal Investigator at IRTA: Dr Noèlia Carrasco. EU Total funding: €2,995,636.

Albufeira, Portugal.

FELLOWSHIPS AND AWARDS

2021 Junior Researcher Position under the project “*Mitigation solutions for the reproductive disorder of Senegalese sole cultivation (MITIGASOLE)*” to be conducted in the Centre of Marine Sciences (CCMAR) funded by FCT **Stimulus of Scientific Employment, Individual Support (Portugal)**.

2019 Seal of Excellence (European Commission – H2020). The project MITIGASOLE was scored as a High-Quality project proposal in 2018 call in Marie Slodowska-Curie individual European fellowship.

2019 STSM- Cost Action “EPITRANS”. Short stay during post-doctoral fellow to open a new line in epitranscriptomic in Senegalese sole. Financial support provided by Cost Action EPITRANS. Nord University.

2018 Post-doctoral Fellowship (Mar2020 Programme). Financial support provided by Mar2020 Program (Direção Regional de Agricultura e Pescas do Algarve). University of Algarve.

2018 Seal of Excellence (European Commission – H2020). The project MITIGASOLE was scored as a High-Quality project proposal in 2017 call in Marie Skłodowska-Curie individual European fellowship.

2012 Predoctoral fellowship (FPI INIA). Financial support provided by the Spanish Government and the Ministry of Economy and Competitiveness (MINECO).

SUPERVISION OF GRADUATE STUDENTS

1. Supervisor of MSc student fellow. From 26/11/2021 to 15/12/2022. Maria Mafalda Amaral Fonseca de Almeida. Department of Reproduction Biotechnology, Centre of Marine Science (CCMAR), Faro, Portugal.

2. Supervisor of MSc student fellow under “*Laboratory Methods*” proposal for a training period. From 1/01/2021 to 30/05/2021. Maria Mafalda Amaral Fonseca de Almeida. Department of Reproduction Biotechnology, Centre of Marine Science (CCMAR), Faro, Portugal.

3. Co-supervisor of a **MSc student** fellow. From 01/10/2019 to 15/12/2020. Tomás Geraldos dos Santos. Department of Reproduction Biotechnology, Centre of Marine Science (CCMAR), Faro, Portugal. Principal Supervisor: Catarina Oliveira.

4. Supervisor of a **Bachelor student** fellow. From 01/10/2019 to 14/06/2020. Maria Mafalda Amaral Fonseca de Almeida. Department of Reproduction Biotechnology, Centre of Marine Science (CCMAR), Faro, Portugal. Co-Supervisor: Prof. Elsa Cabrita.

5. Co-supervisor of a **Bachelor student** fellow. From 01/03/2018 to 06/09/2018. Gabriel José Patrício Moço. Department of Reproduction Biotechnology, Centre of Marine Science (CCMAR), Faro, Portugal. Co-supervisor: Catarina Oliveira; Principal Supervisor: Prof. Elsa Cabrita.

6. Co-supervisor of a **MSc student** fellow. From 01/05/2014 to 01/09/2014. Juvenal Napuchi. Department of Fish Reproduction, Institute of Research and Technology Food and Agriculture (IRTA), Tarragona, Spain. Principal Supervisor: Neil J. Duncan.

TEACHING ACTIVITIES

1. Seminar for students from Master in Aquaculture and Fisheries in the University of Algarve. *Behavioural studies with future application in aquaculture*. University of Algarve, Faro, 16 November 2021.

2. Seminar for students from Master in Aquaculture and Fisheries in the University of Algarve. *Behavioural studies with future application in aquaculture*. University of Algarve, Faro, 18 November 2020.

3. Seminar for students from Master in Aquaculture and Fisheries in the University of Algarve. *Behavioural studies with future application in aquaculture*. University of Algarve, Faro, 14 October 2019.

4. Seminar for researchers/members from Nord University in Bodø, Norway. *Chemical communication and Dominance behaviour in Senegalese sole.* Nord University, Bodø, Norway, 15 February 2019.

5. Seminar for Laboratory members from Genomic group in Bodø, Norway. *Preliminary results on the effect of kisspeptin treatment on reproductive performance of Solea senegalensis.* Oliveira, C., Fatsini, E., Cabrita, E. Nord University, Bodø, Norway, 16 January 2019.

6. Seminar for students from Master in Aquaculture and Fisheries in the University of Algarve. *The importance of behavioural studies in aquaculture.* University of Algarve, Faro, 15 October 2018.

7. Seminar for researchers and students from CCMAR. *The importance of behavioural studies in Senegalese sole (Solea senegalensis) cultivation.* Centre of Marine Science (CCMAR). CCMAR, Faro, 21 May 2018.

8. Seminar for researchers and students from IRTA. *Genes as “Stress coping” biomarkers of Senegalese sole.* Institute of Research and Technology Food and Agriculture (IRTA). IRTA-SCR, 4 September 2014.

OUTREACH ACTIVITIES

1. Course imparted for general public (teenagers) “Ciência, uma visão do futuro 2021” - A aquacultura como recurso alimentar para o nosso futuro. Organized by the University of Algarve. 14 July 2021.

2. Course imparted for general public (children) “Ciência, uma visão do futuro 2020” - A aquacultura como recurso alimentar para o nosso futuro. Organized by the University of Algarve. 13 July 2020.

PROFESSIONAL TRAINING COURSES

1. Participant in the course “**Liquid chromatography and mass spectrometry methods in marine sciences**”. Organized by ASSEMBLE + in the Centre of Marine Sciences (CCMAR) 2019. Faro, Portugal (29 – 30 October 2019)

2. Participant in the course “**Introductory bioinformatic course to sequencing data processing**”. Organized by AQUAEXCEL 2020 program in the Institute of Aquaculture in the University of Stirling 2019. Stirling, Scotland (UK) (26 – 30 August 2019).

3. Participant in the "Course on Animal Experimentation. Category B". Organised by CAL-AQUA in Centre of Marine Sciences (CCMAR) 2018. Faro, Portugal (2 – 6 July 2018).

4. Participant in the “**Course on academic research skills**”. Organised by Institute of Research and Technology Food and Agriculture (IRTA) in the Autonomous University of Barcelona, Spain, imparted by Dr. Steve Quarrie (Belgrade University). (20 – 24 July 2015)

5. Professional activity of sailor on fishing vessels (Agricultura i Pesca de la Generalitat Valenciana) 2010. Valencia, Spain.

6. Participant in the course “**specialization in Photoshop CS6**” (FPO). Organised by Santillana Formation, S. L. 2007. Cadiz, Spain.

7. Participant in the course “**Advances in genetics and pathology in aquaculture**”. Organised by CSIC and University of Cadiz. 2006. Cadiz, Spain.

NATIONAL COLLABORATIONS

29/06/2015 - 10/07/2015. **Visiting PhD student**, Spanish National Research Council (CSIC) Barcelona, **Spain**. Supervisors: Dr Joan Cerdà and Dr François Chauvigné. Topic: ELISA development for gonadotropins (Lh and Fsh) in Senegalese sole.

23/02/2015 - 16/03/2015. **Visiting PhD student**, Instituto de Investigación y Formación Agraria y Pesquera (IFAPA-El Toruño) Cádiz, **Spain**. Supervisor: Dr Manuel Manchado. Topic: validation of genes included in RNA-seq performed in the upper olfactory rosette of Senegalese sole.

INTERNATIONAL COLLABORATIONS

05/01/2019 – 06/03/2019 **Short Term Scientific Mission COST ACTION** inside the COST “EPITRANS”. Nord University, **Norway**. Supervisor: Prof. Jorge Fernandes. Topic: The implication of kisspeptin 2 in mRNA modifications (m^6 -methyl-adenosine) in Senegalese sole breeders.

07/02/2016 - 06/04/2016 **Visiting PhD student**, Institute of Aquaculture. University of Stirling. **Scotland**. Supervisor: Prof. Simon Mackenzie. Topic: Characterisation of transcripts related to dominance behaviour in the brain of Senegalese sole juveniles.

07/09/2015 - 07/12/2015 **Visiting PhD student**, Department of electrophysiology, Centro do Ciéncias do Mar (CCMAR) Faro, **Portugal**. Supervisor: Dr Peter Hubbard. Topic: olfactory sensitivity to different conspecific fluids in Senegalese sole using electro-olfactogram.

07/01/2014 - 02/04/2014 **Visiting PhD student**, Institute of Aquaculture. University of Stirling. **Scotland**. Supervisor: Prof. Simon Mackenzie. Topic: Characterisation of transcripts associated with stress coping styles in Senegalese sole juveniles.

15/03/2013 - 15/04/2013 **Visiting PhD student**, Institute of Aquaculture. University of Stirling. **Scotland**. Supervisor: Prof. Simon Mackenzie. Topic: RNA extraction from different tissues (liver, brain and olfactory rosettes) of Senegalese sole.

ADDITIONAL RELEVANT INFORMATION

2018 Portuguese (speaking and writing).

2014 First Certificate in English (B2). University of Cambridge.

RESEARCH TECHNIQUES

Animal husbandry: Larval fish culture and fish rearing; broodstock management.

Microbiology: media preparation; growth and maintenance of bacteria.

Molecular biology: RNA and DNA extraction; conventional PCR; Real-time quantitative RT-PCR assay.

Epigenetics: small non-coding RNA library preparation and sequencing.

Epitranscriptomics: RNA methylation using Immunoprecipitation method and sequencing.

Histology: all conventional histological procedures and conventional light microscopy.

Biochemical analysis: Hormone and steroids measurements (ELISA).

Electrophysiology: Electro - olfactogram (EOG) and electro - encephalogram (EEC) in fish.

Computer assisted analysis and imaging system: Basic statistical analysis, Olympus Analysis cell and Photoshop CS6; Image analysis specialised in animal behaviour; Cytoscape.

PEER-REVIEW

E. Fatsini is actively involved in peer-review processes for several important scientific journals such as, Aquaculture Journal, Aquaculture Reports, Physiology & Behavior, Journal of Fish Biology, Egyptian Journal for Aquatic Research, Scientific Reports, Applied Animal Behaviour, Fishes (MDPI). In total, E. Fatsini has reviewed 19 manuscripts since 2018.
